ERRATA

Two errors have been found in Induced Abortion: A World Review, 1986 (6th Edition).

Page 30, Table 2: The third column is the abortion rate per 1,000 women aged 15-44. The heading "Abortion ratio per 100" should be moved one column to the right.

Page 86: The sentence beginning on line 13 should read, "Furthermore, in efforts to shorten the time needed for dilatation, efforts have been made to develop other types of hydroscopic dilators."
